Household

Look what Aquacore can do for your family...

Safety

Aquacore arrests impurities as small as .02 microns in size (less than one millionth of an inch), such as...

Bacteria ³	99.9999%
Giardia ⁴	99.99%
Cryptosporidium ⁴	99.99%
Viruses ⁴	99.95%

Convenience

With Aquacore, you can get your drinking water from any source in your home.

- No more shopping for bottled water
- No more replacing faucet and pitcher filters¹

Aquacore's Meter/Controller assures fully automatic operation with no maintenance² for up to 5 years.

Aquacore works on a wide range of water pressure.

Peace of Mind

Aquacore is **friendly to the environment** as it does not add any chemicals to your water and will not create any waste.

Unlike Reverse Osmosis systems that waste more than 3 times as much water as needed for consumption, Aquacore is **friendly to the environment** as it uses a minimal amount of water to remain clean and fresh.

Aquacore is **friendly to your plumbing** as it will not produce water that can damage your pipes.

Aquacore is **friendly to water saving** as it allows you to use water using appliances, helping you save water efficiently and extending their useful life.
